PROFILE

I am an enthusiastic 3rd-year Computing and Information Systems undergraduate at Sabaragamuwa University of Sri Lanka, with a strong interest in full-stack development. I have gained practical experience through various academic projects, which have strengthened my communication, teamwork, and problem-solving abilities. I am passionate about learning new technologies and contributing to innovative software solutions.

EDUCATION

B.Sc. (Hons) in Computing and Information Systems

Sabaragamuwa University of Sri Lanka

2024-Present

IT Certified Master

Institute of Computer Engineering Technology

2025-Present

G.C.E Advanced Level - Physical Science Stream

A/Rajanganaya Tract 05 M.V

2014 - 2022

PROJECTS

Appointment Booking System - Ongoing

Individual Project

I am developing a full-stack appointment booking system using MongoDB, Express.js, React.js, and Node.js. I developed a responsive React frontend styled with Tailwind CSS and implemented client-side form validation. The system provides RESTful APIs for appointment management and uses JWT authentication for secure user access. It supports appointment scheduling, booking, and management, with a focus on scalability and maintainability. I manage the project using Git & GitHub, including feature branches and code integration.

iFriend Contact Organizer

Individual Project

I developed a Java-based contact management system using Object-Oriented Programming (OOP) principles. I implemented core contact management features including adding, updating, deleting, searching, and organizing contacts. The system applies encapsulation to ensure a structured and maintainable codebase. I also designed the application with reusable methods to improve scalability and code reusability.

Fdratlas - Data Sharing Prtocol System

Capstone Group Project

Developed a secure federated data-sharing system using Go and PostgreSQL, focusing on access control, authentication, and efficient data management.

Hotel Website

Individual Project

I developed a responsive static website for a hotel and hospitality service, featuring accommodation, dining, events, gallery, and booking-related pages. Implemented interactive web components using HTML, CSS, and JavaScript, with a focus on responsive design and user-friendly navigation. Managed the project using Git & GitHub and deployed the website using GitHub Pages.

TECTNICAL SKILLS

- Programming languages – JavaScript, Java, C, PHP, HTML
- Frameworks & Libraries – CSS, Tailwind CSS
- Databases – MySQL
- Technologies and Tools – Figma, Canva, VS Code , Git, GitHub

SOFT SKILLS

Team Working Skills	Time Management	Communication Skills
Problem-Solving Skills	Critical Thinking	Self-Learning
Leadership	Creativity	Emotional Intelligence

ACHIEVEMENTS

- First Runner Up - JXG D'Hack-Department of Information Technology,University of Sri Jayewardenepura
- First Runner Up - PearlHack 3.0 - IEEE Student Branch, Sabaragamuwa University of Sri Lanka
- Semi Finalist - Hack Like A Girl - SLASSCOM

VOLUNTERING EXPERIECNCE

University Ambassador – IEEE WIE Student Branch Affinity Group
University of Moratuwa

Graphic Designer – Society of Computer Sciences
Sabaragamuwa University of Sri Lanka

Design Team – IEEE Day 2026
Sabaragamuwa University of Sri Lanka
